## PROFILE

Computer Science undergraduate with strong Python, OOP, and problem-solving skills. Familiar with Flask, FastAPI, REST APIs, SQL databases, and web development. Seeking to contribute to backend and full-stack projects while building scalable and efficient software solutions.

## EDUCATION

### Kongu Engineering College

*BE in Computer Science And Engineering*

- **CGPA:** 8.54 / 10.0

Perundurai, Tamilnadu

Aug. 2024 – May 2028

### Nandhi Matric Higher Secondary School

*State Board | Stream: CS/PCM | **Percentage: 83%***

Erode, Tamilnadu

May 2024

## PROJECT EXPERIENCE

### Ensemble-Based Crop Recommendation System | *Python, Scikit-learn, Pandas* | GitHub Jan. 2026 – Present

- Built a crop recommendation system using stacking-based ensemble learning to suggest optimal crops based on soil and environmental data.
- Combined multiple base models with a meta-classifier, improving prediction accuracy over individual models.
- Implemented end-to-end pipeline including preprocessing, feature selection, and evaluation.

### Recruitment / Internship Matchmaking System | *Java, SQLite, JDBC* | GitHub Sep. 2025 – Nov. 2025

- Designed a backend system to automate candidate-role matching using rule-based skill evaluation.
- Stored and queried candidate data using JDBC with SQLite for efficient filtering and retrieval.
- Built a modular architecture enabling flexible updates to matching logic.

### Automated Duplicate File Detector | *Python, Hashing, Tkinter* | GitHub Aug. 2025 – Sep. 2025

- Developed a desktop application to detect duplicate files using content-based hashing.
- Designed logic to identify duplicates independent of file names, improving accuracy.
- Integrated a simple UI to automate file management and cleanup.

### WanderLust-Rental Listing Platform | *Node.js, Express.js, MongoDB Atlas, EJS* | GitHub Apr 2026 - current

- Built a full-stack rental listing platform with authentication, property listings, and reviews.
- Implemented secure login/signup using Passport.js, sessions, and protected routes.
- Integrated Cloudinary for image uploads, map-based location display, and MongoDB Atlas for cloud database management.
- Designed schema relationships between users, listings, and reviews using MongoDB.

## TECHNICAL SKILLS

**Languages:** Python, Java, C++, C, JavaScript

**Backend Development:** Flask, FastAPI, REST APIs

**Data & Analysis:** NumPy, Pandas, Matplotlib, Seaborn

**Web Development:** HTML, CSS, Tailwind CSS, Bootstrap, EJS

**Frameworks / Stack:** MongoDB, Express.js, React.js, Node.js

**Databases:** MySQL, MongoDB

**Tools & Platforms:** Git, GitHub, Vercel, Cloudinary, MongoDB Atlas

**Coding:** Solved 200+ DSA problems on LeetCode

## ACHIEVEMENTS

Secured 2nd Prize in Department Level Ideathon 2025, Pre-finalist at Smart India Hackathon (SIH) 2025, 1st Prize in Coding at KEC (2026), Won CodeUp at KEC (2026), 3rd Prize in Frontend Development at KEC (2026)

## CERTIFICATIONS

Python for Machine Learning–HCL Technologies (2026), MERN Stack Development–Apna College (2025-2026), Machine Learning and Deep Learning using Python–KEC (2025), Spring Boot–KEC (2026)
